

SABERTOOTH™

SABERTOOTH™

PIER BRACKET

THE WORLD'S MOST  
ADVANCED PIER BRACKET

**Options** - Bolt and nut accessories allow adjustment to seating or can secure replacement concrete for damaged footings.

**Massive Capacity** - 100 kip ultimate capacity. Our strongest bracket ever!

**Get a Grip** - Four teeth keep things in place while driving and are perfect for holding box steel tubing for when a footing needs reinforcement.

**Locking Reinforcing Sleeve** - Lock in place after the first push and keeps the bracket steady.

**Interlocking Construction** - Each piece of the SaberTooth bracket interlocks with the others so it's not entirely reliant on welds.

THE BEST PIER BRACKET

YET
